

smart PLACE – everything under control!

Intelligent home automation increases comfort and improves quality of life: With the smart PLACE system, you can control all your apartment's functions via a user-friendly touch panel. Thanks to its clearly structured menu, operating the lights, shutters, heating, ventilation and video intercom is absolute child's play.

The twelve-inch touch panel is placed in a central location in your apartment. Each room is also equipped with modern controls for lights and shutters. smart PLACE creates added value in a targeted manner: Press just one button when leaving the apartment and power sources such as lights and connected sockets automatically switch off. smart PLACE takes the hassle out of your daily routine, increases comfort and simplifies your life within your own four walls.

Your system can be extended by any number of features, including multi-room audio systems, multimedia centres, tablet control, alarm and monitoring systems, welcome scenes, complex lighting scenes and electronic access systems.
